

MOHAMMAD LARAIB

Frontend Developer & Data Analyst

+91-9335996207 — laraibsiddiqui81@gmail.com — [LinkedIn](#) — [GitHub](#)

Summary

Computer Science undergraduate skilled in front-end development with React, TypeScript, and Tailwind CSS, and in data analysis using SQL, Power BI, and Python. Built responsive web projects and data visualizations, and completed certifications in AI, data engineering, and digital advertising. Trained through IIT Kanpur programs, with strong problem-solving, teamwork, and public speaking skills.

Skills

Programming: Python, SQL, C, JavaScript, TypeScript, HTML, CSS

Frontend: React, Tailwind CSS, Bootstrap, Responsive Design

Data & Analytics: SQL, Power BI, DAX, Data Analysis, Data Visualization, Data Science with Python

Tools & Platforms: GitHub, REST APIs, Google Docs, Canva, LeetCode, Claude

Soft Skills: Team Player, Project Management, Adaptability, Problem Solving, Public Speaking

Training & Workshops

C Programming Training | Prutor (IIT Kanpur)

- Completed rigorous training on the **Prutor.ai** platform developed by IIT Kanpur.
- Covered **Pointers, Dynamic Memory Allocation, and File Handling**; solved complex algorithmic problems with a focus on **code optimization and logic building**.

Python Programming Training | E&ICT Academy, IIT Kanpur

- Completed comprehensive training on **Python fundamentals, Data Structures, and Object-Oriented Programming**.
- Intensive coverage of Core Python, syntax, and application development under E&ICT Academy experts.

Cyber Security Workshop | Krishna Institute of Technology

Projects

HR Analytics Dashboard | Power BI, DAX

- Built an interactive Power BI dashboard on employee data with KPI cards for **Total Employees, Attrition Count, Attrition Rate, and Average Monthly Income**.
- Analysed attrition by **department, job role, salary hike, and overtime** using column, 100% stacked bar, and pie charts.

Heart Disease Analysis Dashboard | Power BI, DAX

- Built a Power BI dashboard on a synthetic patient dataset with KPIs for **total patients, heart disease cases and %, average age, cholesterol, and blood pressure**.
- Compared heart disease rate by **gender, age group, smoking status, and chest pain type**, with slicers for interactive filtering.

Movie Search App | HTML, CSS, JavaScript

- Built a responsive web app that lets users search for movies by title and view key details in one place.

Survey Form | HTML, CSS

- Built a simple survey form to collect people's opinions and feedback in an easy and organised way.

Technical Documentation Page | HTML, CSS

- Created a documentation page that helps users understand features and project setup.

Data Visualization – Bar Chart | Data Visualization

- Developed a simple tool that displays information as a bar chart for better understanding.

Achievements

- **1st Rank:** Speak to Peak – a competition on public speaking.
- **2nd Rank:** War of Words – a mega debate competition.

Certifications

- | | |
|--|--|
| • Google Ads Apps Certification Google, Sep 2026 | • AI – Data Engineering Analyst NASSCOM, Jul 2026 |
| • Fundamentals of Meta Advertising IIDE, Jul 2026 | • Claude 101 Anthropic |
| • Responsive Web Design | • Data Visualization |
| • JavaScript Algorithms and Data Structures | • Scientific Computing with Python |
| • Front End Development Libraries | • College Algebra with Python |
| • Data Science with Python | |
